AutoCAD drawings consist of layers, which are frames, grids, and shapes that contain information about geometric properties and attributes. Layers can be oriented or unoriented; they can be divided into one or more sublayers. The primary elements in AutoCAD are lines, arcs, circles, ellipses, polygons, circles, rectangles, lines, arrowheads, archeads, circles, straight lines, and points. Degree At a 45° angle from the positive x-axis, AutoCAD calls the coordinate that points in the direction of a corner a degree. I am using the following HTML: Download When I use this in Gmail's HTML editor, the link does not appear in the body. In Outlook, it shows the file under the "Attachments" section. How can I ensure the link appears in the body of the email, and if it does, is there a way to change the position (top left, right, bottom left, etc) of the download file?
