October 25, 2015 - Hello, I received the installation files from my institution for ecotect 2011. I'm prompted to enter my serial key during installation, which I can't find because I . NET Framework 4.5.2 is installed. When I try to run the install I get the error: "System.IO.FileLoadException: Could not load file or assembly 'Microsoft.Extensions.Options' or one of its dependencies. An attempt was made to upload a file that does not exist or has been moved. " I have searched many forums but have not found an answer. I can't find a solution for my DLL files and I don't understand what's going on. How can I get my installation key and security code? Thank you.
