Â 9/2/2011 10:07 AM RUN! CADPIPE SOFTWARE IN REVERSE ENGINEERING ALL: Â On other side of sheet are 5 tabs that you would be used to seeing on a Windows application (File, View, Edit, Help, and Debug). Cadpipe can be operated as a stand-alone application for creating, viewing, editing and saving CAD files. Another feature of Cadpipe is to generate the Pipe BOM from a Pipe Network, using the pipes as a stack, without the need to assemble any pipe segments (and possibly align them to the pipe network's pipe locations). Flange shown here in the pipe is manufactured from Hastelloy c. The modular...The invention relates generally to a method and apparatus for measuring fiber quality. In particular, the invention relates to a method and apparatus for measuring the modal quality of a multimode optical fiber. Optical fibers are generally designed to propagate light in a single mode. However, multimode optical fibers are designed to propagate multiple modes (i.e., light carrying multiple optical wavelengths). The modal quality of the fiber is a measure of how well the light waves are aligned in the fiber. The modal quality can be determined by the amount of light energy coupled to a specific mode as opposed to the other modes. The quality can be determined by coupling two light sources into the fiber and monitoring the power levels of the light coupled into each mode. One mode is likely to be brighter than the other because of its better quality. The method can be repeated by offsetting the coupling positions and monitoring the amount of light coupled into each mode. The light coupled from the first source is ideally centered at the peak of the power spectrum from the other source. Based on an analysis of the power spectrum of the light coupled into each mode, a modal quality factor Q_m is obtained. If the amount of light coupled into a mode is half that coupled into the other mode, it would be desirable to be able to calculate that Q_m . This is an example of a method that could be used for a multimode fiber. However, it 3da54e8ca3
