2020.0 2019 was the first year that a "Special Release" year numbering was used instead of a full year release. This "Special Release" number - 2020 - is the first time that AutoCAD has had a 100th Anniversary year since its release in 1982. Since the first version in 1982, AutoCAD has been revised at least 18 times. AutoCAD 1.0 was the first AutoCAD version, released in 1982. Each year AutoCAD is revised, with the exception of

special release years. The number after the year indicates which version of the software was released that year. AutoCAD 2019 is the 19th version of AutoCAD and the 20th version of AutoCAD for the year 2019. AutoCAD 2020 is the first version of AutoCAD for the year 2020. AutoCAD 2020 is the 20th version of AutoCAD for the year 2020. The first 8 versions of AutoCAD were for the personal computer platform. AutoCAD

Predictors of anxiety and depression during treatment of oral submucous fibrosis. This study aimed to assess the prevalence of anxiety and depression in oral submucous fibrosis (OSF) patients during treatment and to determine the predictors of anxiety and depression. The study included a

total of 72 patients diagnosed with OSF, who were given treatment in the dental department of Shaukat Khanum Memorial Cancer Hospital & Research Centre, Lahore, Pakistan, between June 2010 and December 2011. The patients were assessed using a questionnaire. The demographic and disease characteristics were correlated with anxiety and depression using logistic regression analysis. Sixty-nine of

the 72 patients (94.4%) completed the questionnaire. Mean age of the patients was 38.6 ± 10.3 years. Thirty-six (52.2%) patients were male. The overall prevalence of anxiety and depression was 80% and 50%, respectively. Seventy-three per cent of the patients were single, and 67% were unemployed. Sixty-seven per cent of the patients were from rural areas. Oral examination revealed that 50% of the patients were in stage III. In

the logistic regression analysis, the predictors of anxiety were being a woman, being a farmer, and having oral and dental pain. The predictors of depression were unemployment and having oral and dental pain. Although the prevalence of anxiety and depression in OSF patients was high, it was not associated with gender, age, marital status, and occupation. It was associated with the physical illness in the oral and dental a1d647c40b
