Weather Meter Crack +

Weather Meter is a simple and handy piece of software that helps users to view the current weather forecast from any city in the world. The interface of the widget has a modern-looking design, resembling most Windows Gadgets. In addition to that, the UI is user-friendly, which means that any type of individual is able to use it, no matter their previous experience with the IT world. Aside from the temperature, the main window presents a lot of useful information such as the air humidity, atmospheric pressure, wind speed, percentage of cloud coverage, along with the hours of sunrise and sunset, moon phase, and day length. The interface is highly customizable, as it allows you to change all the colors used in the widget and hide any piece of information. The settings panel is quite extensive and it enables you to change the location by inputting the name of the city, IP address, postcode, and even latitude and longitude. You can also set the app to refresh the information displayed every 30 or 60 minutes, as well as modify all the measurement units the data is expressed in. Right clicking on the main window brings up the context menu, containing entries similar to most Windows Gadgets, such as moving or closing it and adding other widgets. Moreover, you can force the software utility to stay on top of all other apps, and tweak the opacity from 20% to 100%. To sum up, Weather Meter is a lightweight sidebar gadget that enables users to view the current weather details from any location on Earth. The main window displays an impressive range of information that you are

sure to find useful. The price of the app is absolutely free, but you are able to remove the ads that appear in the app by purchasing the premium version.

What's New in the?

Weather meter is a Windows desktop companion which shows you the weather forecast for today, the next 10 days, and the rest of the year. It features a dark interface and a large weather widget. It displays the weather forecast, as well as other interesting info. In addition, you can set the forecast time interval (1 hour, 1 day, 1 week, 1 month, 1 year). The forecast is automatically updated every 1 hour, and you can choose between hourly, daily, weekly, and monthly forecast. The forecast is displayed in the small weather widget. In addition, you can also view: - tomorrow weather forecast - one week forecast - one month forecast - current weather - graph chart which is updated every hour

System requirements: - Windows 7 or higher

It's a very nice weather application. You can control so many functions by right clicking on the weather widget. It is easy to use it and very good looking. I recommend it.

Review by: Sophie China Rating 5 of 5 stars January 20, 2018 I like it and so easy to use!

Review by: Jezier Rating 5 of 5 stars October 4, 2017

It works very well. Review by:Dennis Rating 5 of 5 stars September 18, 2017 Works great Review by:Ann B Rating 4 of 5 stars September 4, 2017 Free! Review by:Andrew Flores Rating 4 of 5 stars September 4, 2017 Good, but lacks some of the functions I want Review by:Lucia Rating 4 of 5 stars August 25, 2017 Better than the forecast of my browser Review by:Sylvain Giry Rating 4 of 5 stars July 2, 2017 Works as expected. Review by:Radu Rating 4 of 5 stars June 3, 2017 good Review by:Caroline Rating 5 of 5 stars June 1, 2017 Very nice app It works well, very nice app Review by:Erol Gupta Rating 4 of 5 stars May 21, 2017 Review by:Jamie
