Can you please help me with this? Thank you! A: I suspect that the exercise is just asking you to input the numbers and leave the rest of the text as it is. First of all, it isn't necessary to split the text and convert it to lowercase. row\_count = File.open("input.txt").read.count(" ") column\_count = File.open("input.txt").read.count("\n") matrix = Array.new(row\_

Stewart, in his book Introduction to Mathematics for Life Scientists (biocalculus) (Stewart/Day) Shaker Connection The shaker connection is an indirect connection between a steam boiler and a chiller using a primary condenser. The shaker connection was invented in the early 1950s. It is designed to allow the chiller to be more compact and compact machinery. Another advantage is the chiller can be smaller in size because the primary chill water is pre-cooled before it reaches the secondary chiller. The shaker connection consists of a vortex chiller coil mounted on a common heat transfer plate, which is enclosed in a cylindrical sleeve in the direct side of the header tee. A primary condenser is located on the right side of the header tee and is integral to the vortex coil. The primary condenser is connected to the header tee through a vertical flange designed to allow the primary 3e33713323
