First level is a simple choice: choose your hero and go to the hall with "Arcade" symbol and start the game. When you start the game the first thing to do is to choose your hero. The heroes have their own unique personalities. These characters play an active role in the game. Each one of them looks out for its own things. The game will make your hero go to the places he wants to go and solve puzzles that are there. When you will be in the area where you want your hero to go to click on the mouse on the places you will see some spots you can click to enter. When you enter into a place you can choose what to do. Here you can use your hero to find the spots where you want to go. It will cause some switches to activate and do some action. Sometimes it will be hazardous and need to be careful.
