GoPro captures the adventure you never thought possible with GoPro HERO5 Black, a new waterproof smartphone that captures stunning 4K video, includes intelligent features like Smartburst AF and is faster and more power-efficient than ever. "One of the most fun and exciting models we have ever brought to market and it definitely lives up to the GoPro name," said Rob Roy, vice president of marketing at GoPro. "Introducing this HERO5 Black makes it easy to capture any adventure and combine it with a GoPro rig and mount, and share the result with your friends and family." The newly designed HERO5 Black is the most powerful HERO5 Black model yet, and delivers enhanced control and easy viewing. This model offers continuous shooting at 1080p60 and 12-bit 4K video (1440p30). It combines this unprecedented level of performance with reliable Wi-Fi capabilities, great optics and intuitive controls. It's water resistant to 60m (180 feet) for the

first time, and it even has an improved mount system, which allows you to quickly attach to a variety of mounts for smooth, stable shots. This model also introduces a number of innovative Smart features.

Smartburst AF is designed to quickly select the best-performing burst settings for each shot, giving you the fastest burst speed possible and the smoothest video. This is available even in challenging lighting situations, and is also beneficial for long-exposure photos. When you're working in 4K, Smart Resolution allows you to easily switch between slow and fast-motion video with a simple tap, and with ultra-fast wireless transfer you can quickly share your adventure to the big screen. Advanced Features While the new design gives you amazing photo and video capability, it also allows you to expand the creative possibilities. The HERO5 Black allows you to easily add a gyroscope or accelerometer to add 6DOF (6 Degree

of Freedom) stabilization to photos, and the Dual HERO6 mount stores two HERO5 Cameras and can handle up to three HERO7 Cameras. GoPro also developed a new HERO5 Black housing that offers improved usability. A new take-down feature makes it easy to take off the mounting and battery cover, and to attach the mounting plate and battery cover quickly, while a new “top case retraction” mode allows you to easily bring the housing back together without removing the battery cover. In addition, the HERO5 Black introduces new accessories. The GP+ Grip is designed to be
