Matching real-life player movement data with the artificial intelligence (AI) team makes for an experience that resembles the real thing more than FIFA ever has before, and is sure to be a true test of your man-machine match making skills. The new physics engine and AI of FIFA 22 have been completely reworked, along with an extensive gameplay system overhaul and development toolset, and will take full advantage of the power of the Xbox One. In fact, it's been said in-development FIFA game you can create complete new universes of football for yourself - and your friends. The new hyper-accelerated match engine will make it feel like you're playing on a fast-paced, professional-standard pitch. KEY FEATURES - Real Player Movement - Using over 22 years of motion capture data, the game uses real-life player movements when playing a complete high-intensity football game in motion capture suits. This is the most comprehensive movement data ever collected to bring the most realistic player movements to the world of football. - AI Intelligence - AI plays with complete conviction and unpredictability. On-pitch intelligence and tactics have been completely re-worked, and the AI responds naturally to the pace of the game. - 1-v-1 Creativity - In FIFA 18, you could play in a full-scale football match, all by yourself. You could create the team you wanted to play, set them up, play for the first time, and then go back to sleep. In FIFA 22, you can do it all yourself. Create the team, set them up, play for the first time, and go back to sleep. This allows for endless variations on the rules of football. - Full-scale Leagues - Play in pre-made leagues for club or national teams or create your own in-game. With the ability to create teams, add your friends, and play as both, you can create your own football universe with custom rules. - Full 3D Match View - Navigate through the pitch, engage in 2-on-2 clashes and duels, and even go for a header from distance. - Real-time Tactics - In FIFA 22, you're the coach. Set up your tactics, then watch the AI play out the game. - Skill-based Match-Making - The game gives you a great number of interactions with the pitch and players in real time, and

What's new:

- **New Animation Capture Technology - The new Motion Capture engine will help football feel more realistic, more responsive and control-intensive. This is enabled in three ways:**
 - **The engine's shooting animation engine has been upgraded to make larger movements easier to implement, and introduce more realistic movements, such as sprinting and more diverse lunging and diving.**
 - **Attacking animations have had improvements made to how they're triggered and how they're played out.**
 - **Motions have been made much more smooth and natural when they occur. You will notice that a player's hands and feet are easier to control as he sprints forward.**

All-new Season Diagram Experience - A new Season Diagram will be used to produce player and team summaries and statistical information. New to this version is a graphical comparison of every player's statistics to see how they match up with their peers.

Real Team Finances

- **For the first time, more than 28 million players around the world can now compete as a realistic team of 23 players online. Every attribute, from salary to squad rotation, will impact a team's overall success, as will the relationships and dependences of players.**

Improved Match Physics

- **Content creators can now use additional animations to create more challenging and realistic scenarios. You can now drag and drop player shapes (Aimed at Goalkeeper animations)**
