Fall into the realm of Mystery... What was your life before it all went wrong? Sophia Carter is a girl searching for peace and answers for her abusive past. Living in that foggy memory, is the one hope she has to really hold onto a life she never had. Searching for her childhood home, the path that she must take is set before her. As Sophia starts to unravel the mystery of her past, she starts to make friends and enemies along her journey. That might change your life forever. What is in your past that can destroy you? Who are you? What has been done to you, Sophia? Will it change you? When I walked into the spooky tree-house I had nowhere to go... Sophia will find her way back home, only to realise she's forgotten what it's like. It's up to her to save her family and herself. All services for the account are no longer working, including the cloud save. I have lost 2 months of data because of this, and have recently discovered that my email has been deleted from the account. Heres some screenshots of the problems. I also can't access the Fifa master league and all my games have disappeared from the Cloud Save. Someone please take a look for me, I'm stuck in an infinite loop of cause and effect and his email deleted. @Dragoncon.013 i am not being paid for this, please be aware of that before asking anything, and not commenting on it, which i do not agree with. I just wanted to share my love of the game and not be banned for that reason, having helped alot of other people as well. Are there plans to update the story with further content or achievements? I'm currently stuck on some kind of speedrun, but haven't completed the game yet (I'm about 40% through) and I'd like to make my time-travelling as efficient as possible. @Dragoncon.013 - i am not being paid for this, please be aware of that before asking anything, and not commenting on it, which i do not agree with. #### **King Of Seas Features Key:**

- **Beautiful Item Collection**: Sorry for the delay in explaining it, but for the initial release of the game, a lot of the contents are based on 3D models (even the 3D objects in the room), but to offer a truly realistic **gameplay**, a lot of **data** will be needed. This will be done over the course of several weeks after the initial release. Currently, there are around 100 items in the game.
- **3D Objects**: Sorry to have to say, but a lot of items in this game are 3D objects only. Basically, you will be able to **interact** with the map via a clever combination of both 2D and 3D objects. For example, on an island where there is a building you can see from the map, you can actually pick that up.
- **3D Objects Properties**: Instead of coding an object by hand, we will provide explanations of each item's properties on the title screen.
- **Beautiful Soundtrack & Background Music**: In the minimalist style in the game, we'll provide soundtracks and background music. In fact, just like the sadistic contrast of the game, we will try to experiment with making our soundtrack too much. Currently, we have around 11 sound effects and background music for this game.

#### What's new in King Of Seas:

ide King of Seaside is a multimedia Flash video game developed by Spark Plug Games and published by Eidos Interactive. It was first released for Microsoft Windows as a puzzle video game and on September 11, 2009 for the PlayStation Portable as a platform game. A sequel to the game, King of Angry Birds, was released on November 8, 2011. The games follow a story of a young boy named Joey taking on an evil king to save the city of Seaside from destruction. It was part of Spark Plug Games' Game Show Network, starting with its first game, Show Thing! on Android. The player must play through levels to progress the story. A sequal to King of Seaside called King of Angry Birds was released on PlayStation Portable and Nintendo DS. The game received generally favorable reception for its presentation, gameplay, and audio. Gameplay Each level in the game of which there are 37 including a tutorial, is based on one of 14 episodes of seasons 1-2 of the television show Jay Jay the Game Show. Each episode is presented as a solitary game of the same rule set. During one of the episodes, the king of the game has kidnapped one of the episode's characters, a doctor-like character that can distract enemies from with a No-Suit-Called-Doctor. In two levels, the player takes the role of Joey, another character from episodes of the television show. He has a rack with a series of colored eggs to be opened, and he rides around the course on a laser-powered scooter. The game features an elementary word search puzzle mechanic, which is used to solve "maps" that guide Joey to his objective. In some levels, players can pass a wooden block under the "stones" of a puzzle that must be solved. In some other levels, players have to knock over blocks or place the blocks strategically to move the traps or obstacles that Joey has to deal with. In most levels, the player must travel the course avoiding traps and obstacles to progress. Each level has an evil king located in a different palace building (called a "Castle") who will trap the player inside of it. Defeat the king to win the level, while destroying traps and barriers along the course as well as hazards posed by the king, again to win the level.

As of episode 5, "The Not So New Doctor", players no longer have the ability to ride the scooter: they must use the computer mouse to control Joey. The map system is
