Made By: Alexander Bochet I am a retired Administrative Professional who has owned a variety of small businesses since 1979. I have taught business related courses at public and private universities since 1998. My current activities include consulting, working with a small business incubator, and starting my own consulting practice. I am a member of the Guild Hall Knights of Columbus Council #7327. What is Elder Scrolls Online? Elder Scrolls Online is a free-to-play MMORPG developed by ZeniMax Online Entertainment and published by Bethesda Softworks. It is based on the Elder Scrolls series of role-playing video games, which is developed by Bethesda Game Studios. Gameplay is set in the elven home of Tamriel, roughly in a modern-day setting. The plot centers on player choice in a persistent world environment where they will fight against a faction of undead named the Daedra and other monsters within an intense conflict. Elder Scrolls Online launched on March 18, 2014, however, there has been a great deal of criticism about the game's installation and gameplay. The game launched with a sub-optimal client and virtual world, and as of April 4, 2015, there were technical issues that prevented players from being able to log in to their characters, and some players were not able to log in at all. On April 24, 2014, ESO was released on the PlayStation 4 and Xbox One.

Q: Fastest way to fill a large matrix with random numbers I am trying to create a large matrix with random numbers. I've coded a way to do this where I start by creating a large vector of 0's: % Fill in the vector b = zeros(5e6,1) % Try to insert random values into b A = arrayfun(@(x)randi([1 3 5],x),1:5e6) b(A) = 1 Though this process seems very slow, especially since I need to insert many more values into the matrix later on. The generated matrix looks like this: A = 1 3 5 7

Got to give Susie a variation of this: Primitive (santafe,sp?) (opposite of), a western phrase that means really cool and collected. Sand is the same, I think. Each of the old sandals were wide at top and narrowed down at the toe. (Also the word "sandal" comes from the old Italian word: sandali.) The sandal has two parts, a material on one side and a lining on the other.
