Espera Portable is a lightweight software application built specifically for helping you listen to your favorite songs stored in your computer or uploaded on YouTube. Since this is the portable version of the program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to play songs on the breeze, without having to go through installation steps. The interface is intuitive enough to be configured without having to consult a help manual or watch online tutorials. Espera Portable gives you the possibility to upload files into the working environment using only the built-in browse function, so you cannot rely on "drag and drop" operations. Files cannot be added individually to the list, so you should make sure the selected folder contains the exact audio files. The tool enables you to create multiple playlists, play or pause the current audio selection, adjust the volume, seek for a position in the audio streams, and go to the previous or next song. Additionally, you can view information about each song, such as title, duration, artist, album, genre, and file location. One of the best features included in this program lets you perform search operations for quickly finding a song in your library or uploaded on YouTube. Plus, you can listen to the YouTube audio streams, add the selected one to the playlist, and check the details about YouTube clips, namely image, title, duration, rating, number of views, and URL. Last but not least, you are allowed to watch the YouTube videos via your default web browser, change the layout of the utility by selecting from different color themes, as well as activate the Party Mode, which allows you to lock several functions related to playing and pausing songs, altering the volume, switching playlists, removing songs from the library, and locking the main window. Plus, you can switch to a full screen mode, and encrypt data by setting up passwords. All things considered, the intuitive interface and handy set of parameters make Espera Portable an ideal tool for rookies who are looking for a simple-to-use audio application. However, it cannot compete with other powerful utilities on the market, as it lacks support for playlist importing and exporting options, YouTube video preview, sorting functions, hotkeys, and metadata editing capabilities, just to name a few suggestions.

Some Vapors I Have in the House Saturday, December

Espera is a safe and lightweight tool for listening to your digital music. No installation is needed. It's small and portable. No registration is necessary. Espera can read and play MP3, APE, OGG, FLAC and more. You can browse to your music to create playlists, or add music from

your local hard drive to your library. You can search your music by artist, album, or song title. You can search for videos on YouTube. You can play or pause your music, control the volume, go to the next song, and turn up the radio. You can also search for previously played music. You can add new music to your list by inserting a CD or double clicking on files. You can browse and select files by dragging and dropping them on the window. You can view the title of the music, artist and album. You can view the song details. You can also sort your music by artist, album, or song. You can edit the program's appearance using a variety of different color themes. You can monitor and change the program's volume. You can select multiple songs to add to your list at one time. You can lock the program to prevent users from changing its settings. You can change the sound device used for playback. You can pause playback and go to the previous or next song. You can mute the system beep and the progress bar. You can change the start time for playback. You can set repeat mode for a playlist. You can create and save playlists. You can add your YouTube videos to your library. You can double click on a YouTube URL and the video will be loaded in a new browser window. You can set volume for YouTube streaming. You can lock the video to prevent inadvertent changes. You can set the status bar text to display the title of a song. You can enable/disable the control bar. You can set a custom icon to be used as a shortcut for the program. You can set search options. You can set a password to protect the settings. You can set your webcam's volume and set a web cam profile for video playback. You can go to the previous/next video. You can connect to the internet to create a playlist. You can stop/start the internet connection. Technical information System requirements Windows XP/V 3a67dffeec

- Simple to use, yet powerful audio manager - Drag and drop functionality for adding and removing items - Built-in YouTube search - Allows the creation of playlists, and the ability to pause and play tracks - Synchronization to iTunes and Spotify - Update your libraries and playlists with ease! - Create and edit the playlists and libraries in the user's local folder, on any USB drive - Can be launched in "Stand-alone mode" or "In-Context Mode" - Supports Windows XP, Vista, 7, 8, 10

How to Use ESPERA Portable:

- Connect the ESPERA Portable device to your computer.
- Launch the setup wizard and click on "Next".
- Select a specific folder on the ESPERA Portable device where you wish to add the tracks, click on "Next".
- Select where you wish to save the portable device/library on your computer. Click on "Next".
- Select a default image for the context menu, click on "Next".
- Check the compatibility for your computer and the operating system you wish to run it on, click on "Next".
- All settings and options are done, click on "Finish" to complete the installation.
- Close the setup wizard.

A disclaimer: NOT a spyware or adware. Worth 50 minutes to listen to (but not for hours!). There are up to two hours of material for 30+ songs. Though the voice may be hard to understand on the slow-speed dial-up connection where I live, the sample was near perfect (in both voice and equipment) on the much-faster internet connection here. The interface is straightforward, easy to learn, and simple to navigate. The program allows you to create, edit, delete, and play multiple playlists and libraries, and it is fully compatible with PC desktop audio players like iTunes. The program, however, does have a few quirks, and I'd caution against giving it a permanent home on a PC that you'll be using for music playback.

Pros:

- * Portable – you can plug into any USB port on your computer
- * Interface is easy to figure out and navigate
- * Music & YouTube support for offline playback
- * Library (playlist) management
- * The library, files, and music manager are pretty robust

Cons:

- * Library loading is a bit slower than other players
- * Indexing doesn't

What's New in the Espera Portable?

=====

Desktop MP3 Player by ESPERA is a lightweight and easy-to-use MP3 player. It is an easy way to bring your MP3 files from hard disk to your ear. It supports music files in MP3 format or uploaded to YouTube. This portable MP3 player has a handy pause and play features to quickly go through your playlist.
