For Gamers – FIFA 22 brings players closer to the action than ever before with the introduction of a new camera perspective which includes a range of new camera angles, including an in-game angle that rotates around the field without having to go in and out of full view. Players will experience a more immersive approach to gameplay, gaining a deeper understanding of the game. At every corner, players will be presented with crucial decisions that will affect their match. The ball will react dynamically to your every move, taking into consideration the ball speed, position and direction, allowing you to bend the ball in ways never before possible in FIFA. For Producers – For the first time in the FIFA series, creators are able to dive deep into the data and take a close look at the player behaviours and decision-making of the FIFA community. They are able to collect, collect and collect data and use it to craft the stories that will unfold in FIFA’s on-field action sequences. For the Players – FIFA 22 brings tremendous changes to the FIFA User Interface and the control system that will enhance the game for players of all skill levels. The navigation menus have been re-designed and refined to be more intuitive and accessible for players. The inventory has been enhanced to improve the way players view and manage their player cards. Players can navigate all menus using the same control scheme and icon layout as the game itself. FIFA Visual Awareness System (FVAS) is a more in-depth way to view and manage game situations for every players. For example, players can move the position of their Foot on the ball to make passing or shooting more effective. They can also strengthen the acceleration on the ball as they have the tools to control the ball when they aren't necessarily facing the opponent. New Features of FIFA 22 Dive deep into the data When a team is in danger of losing a goal, the goalkeeper may be faced with a difficult save. A closer look at where the goalkeeper is facing when approaching the ball may help the player guide his direction towards the ball. This data will allow the goalkeeper to react without needing to view the entire pitch at once – an action often known as Covering the full-field. Unlock HyperMotion Technology FIFA 22 allows the player to apply “HyperMotion Technology” to help them make in-game decisions more fluidly. “Rotation and movement – Asymmetrical Player Data”
