#True Racing is a racing game, where you can: # Participate in the election, to have the # Game in which you vote for your favorite from a set of politics candidates # And to see the elections with the looks of the candidates # When the results are announced, the game will close and you'll have your choice # Leave your opinion at the comments page. # Roadcrossings don't work, the game works in a fullscreen mode # You can play only 2 cars at once. # 3D without texture (enemies, players and buildings). # Randomized events and courses # There are 25 events and 6 courses # No cheats And of course in the not so distant future will be released the game updates to be able to play on more than one player at once If you like other cars and racing games or even if you don't, as of now i'm not sure which one you'll vote for, but I want you to play to choose the one you want and don't say "I don't like it", it's a joke. You can leave your suggestions and comments, hopefully you can be included in the traffic of the game. Yeaaaaah, a game I really wanted to finish and give to the world for showing the best it could be. And it's first chapter, please listen to me. It was something absolutely crazy, it was just a car game. A kart one. And I wanted it to have all the characteristics of a "true" car game. It has got crashes, weapons, a cup of tea, and all that stuff. The engine has a different sound, cars are different and they have their own styles. But it's a car! But not only a car, it's also a kart! And the best is, is that it has got wheels. Wheels! So the wheels are the best! The way it is, the controls are always the same. So you can be sure that it's a true car and not a kart! And if you have become a fan of karts because of "Pro Evolution Soccer" or something like that, then you'll be understanding the importance of this game, and also the fact that you are right to vote for me if you will play this game, and I want that this is the last update of the game that anyone of you will have the chance to play. The rest of the updates will be releases for smartphones, and

Pressure soak causes cylinder liner to wear faster. Although diesel oil will absorb these hot gases, which is a good thing, when the oil cools and diesel oil thickens, it sometimes get too thick and puts mechanical wear and tear on the engine walls. To keep the engine oil from getting too thick, diesel oil needs to be changed regularly. If in the case, for example, that you have driven over 40 hours a week or longer, 15,000 miles per year, along with 10,000 miles, your diesel oil needs to be changed in the summer or fall – NOT in the spring when condensation has a negative impact upon your heating or cooling systems. Oil changes will keep your

In 1970, John Conway of Cambridge University compiled the game program, which is controlled by several simple rules. However, the combination of these rules can make the program produce unpredictable structure and dynamics

The game of "life" operates in a two-dimensional grid world. Each left mouse click will increase or decrease a grid, or use a new file in the file list. In any case, it will evolve according to simple rules. You can preview 3D stacked cells. With the right grid combination, it will have an amazing effect.

2 Gone are the days of spending 32 hours per week starring in a video game... or is it? There was a time when I spent a great deal of time playing games. Actually, it's mostly gone now. With more and more people deciding to spend their time outside of their favorite video games and couch potato media, it's not surprising. If you aren't most people, however, there's usually one game that people spend more time playing than all others combined. If it's not Halo, it's Call of Duty. If it's not Call of Duty, it's Madden. And more often than not,

that one game is football. That's exactly where a lot of my former gaming time went; the football season has started, and my attention has turned to watching Matthew Stafford act like a quarterback, not to mention watching the new Madden NFL '09 game... and I'm not talking about the computer version, either. No, it's the new real-football, the "elite" version, the Xbox 360 edition. It's the one that takes you inside the game during the action. If you want to know what really happens on the field during a real-life NFL game, watch this. Before I could move on, however, there was a couple of other games I had to complete. Four and a half years ago, when my daughter was in toddler-hood, I was on Team Frustration. Football still has a lot of my heart, but it hasn't always had that. I remember back to a time when soccer was my favorite sport. Guess what? It's still my favorite—and guess who won my fantasy league, by the way? I wear my soccer scarf at home to remind me of how much I love the game. So I'm looking forward to this weekend's Big Game, and two more football games to follow. Oh, and there was that big football game in the first installment of Terrelltown. But, since I missed last week's episode, it's time to catch up. Episode 3: Terrible Things You Will Defy We now have a halfway decent house, but not a town. As we left last week, we came across a new sheriff with a

V3 "Valkyrie Interactive" PSP User Guide English LANGUAGE Valkyrie Interactive is a publisher of the PSP, it started to develop the PSP last time called Valkyrie Trivision. The official site was just a really good looking concept trailer with some songs. The PSP is a device exclusive for the Japanese market. But today, Vita, is the PSP's date. They work in the same environment as the Vita. So, maybe next time will we be able to see some blogs about the English language PSP. In this way, we can find out if it will work in the US and how does the interface works. Also if they will work the same way as the PSP or if it is going to be another platform. This could be a great opportunity to learn something new and maybe an english tutorial for the Vita. Also i really want to know how does the english version of the game looks.
