"RPG Fever Games' new RPG, Elden Ring, is still a fresh experience, but much like great sushi, it can become tough to experience the enjoyment of the moment if you don't know when and how to eat. This fast-paced action RPG is the perfect example. Elden Ring is a refreshing RPG that creates a dynamic mix of field and dungeon gameplay. The setting is geographically diverse, and the world itself is large enough that it isn't repetitive. The quests are a little simplistic, as they often focus on killing monsters, but that's less of an issue than it could be. In addition, the cutscenes are also relatively simple, but that will be forgotten about on the road to your next quest. The cast of characters is also varied enough to keep things fresh. Elden Ring is a fine example of what a fresh RPG experience can do for the genre. When you miss a good meal, or a slow-paced game where you sit there and ponder your next move, Elden Ring will deliver exactly what you're looking for." --RPG Fever Games "This game is an action RPG like no other, with the depth of RPGs and the speed of action games. The world is beautiful, the combat is great, and the music is awesome. This

game is at its best when you're gathering resources, either to return to town or to visit a new locale. My favourite part is when you're using your skills to defeat an enemy, and watching the screen go crazy as you swipe, punch, and kick your way through to victory. Then you get to set your own skills and equipment, which is nice. You'll find various areas that have different enemies, so keep a watchful eye out for the good guys. You'll need to pay attention to the environment, too. Sometimes there are monsters that will respawn after you die, so you'll need to find out where the enemies are coming from before you go out hunting. Combat in Elden Ring is different than other RPG games. It's like a combination of a fighting game and a typical RPG: You always have full control over which attacks to use, and you can perform the combo attacks that you're familiar with from fighting games. You can also change your attack style at any time by hitting the space bar. I found this to be really helpful because it let me get a quick lead on the enemy and then do a more economical attack, or if things got too intense, I bff6bb2d33
